This Briggs & Stratton Lock and Key Service catalog has been compiled in such a manner that correct service parts can quickly be determined. It provides complete Service Parts information on Briggs & Stratton Automotive products used as standard equipment.

All service parts are exact duplicates of the original equipment used by the Automobile Industry, as standard equipment.

For old Service Parts prior to 1928 write direct to Factory.

Briggs & Stratton Original Service parts are guaranteed to be free from defects in material or workmanship for 90 days from date of sale to the original purchaser.

BRIGGS & STRATTON CORP.

Milwaukee, Wis., U. S. A.

LOCK SETS

UNIVERSAL IGNITION AND DOOR LOCK SETS

Matched Lock Sets assure satisfied customers and better profits. They speed up replacements—save time and labor—simplify service—increase turnover—and reduce your inventory investment.

Each set contains 2 locks—one ignition and one door lock, both matched to one pair of keys—ready to install (after cutting door lock shaft to required length). Priced so that both can be sold at the present price of coding and replacing either one, without the labor or delay of matching a new lock to the old one.

- 1778 - Fuse block, four fuses and one spare (192F - 20 amp.)
- 50102 - Fuse block, five active fuses (283F - 10 amp.)

GENERATOR CUTOUTS

Designed for service on taxicabs, trucks, tractors,
motor boats, charging plants, farm lights, plants,
etc.

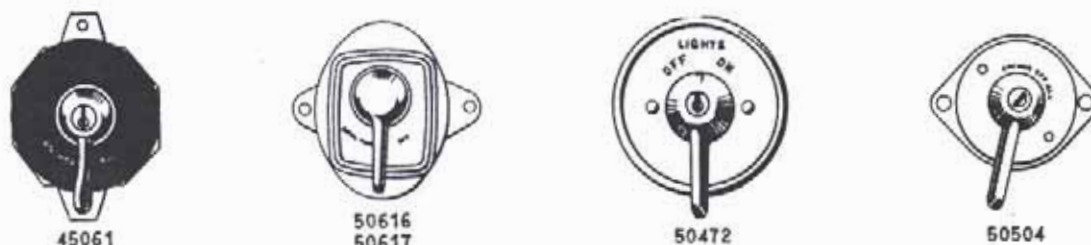

- No. 1441 - 12 Volt - 15 ampere.
- No. 1655 - 6 Volt - 15 ampere.
- No. 342 - 6 Volt - 20 ampere.
- No. 458 - 12 Volt - 20 ampere.
- No. 459 - 35 Volt - 20 ampere.
- No. 976 - 6-24 Volt - 20 ampere.
- No. 1027 - 32-45 Volt - 30 ampere.
- No. 1338 - Like 1027 but has rear mounting studs.
- No. 1386 - Like 976 but has rear mounting studs.
- No. 2415 - 12 Volt - 30 ampere.

AIRPLANE SWITCHES

These dependable Airplane Switches have been approved
by leading Airplane Manufacturers and The United
States Air Corps, by proving they give the most
satisfactory service after the most rigid tests.

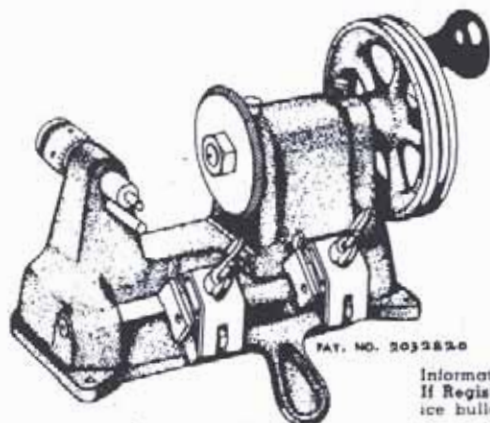

MARINE SWITCHES

These Marine Switches are of corrosion proof construction, manufactured of Brass and Bronze and designed to
meet all requirements and demands of switches for marine use.

LOCK & KEY SERVICE EQUIPMENT

Including Automotive Key Cutting Machine with Key Cutting Instructions — Confidential Key Codes with index and charts for easy reference — Key Code Information Service — Merchandising Displays and Advertising Helps — everything necessary to Install and Profitably Operate a Lock & Key Service Department.

AUTOMOTIVE KEY CUTTING MACHINE
(No. 80774 — \$34.75 Net)

Built accurately for precision key cutting and years of service. Equipped with a patented micrometer that controls the cutting depths—a machine that is truly universal. Spacer guide keys insure accurate spacing of cuts. Duplicates or cuts key by code or number. Construction provides for cutting future designs of keys without expensive rebuilding or added parts. Can be operated either by hand or motor.

CONFIDENTIAL KEY CODES

Complete Code Book, furnished with machine, includes carefully checked authentic codes for cutting over 50,000 different automobile keys by number—21 pages of helpful illustrated instructions—key cutting and lock service charts. Codes and charts show original lock manufacturers' key blank numbers, and cutting data.

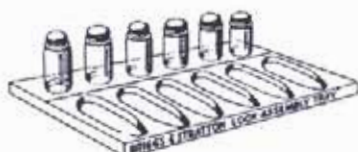

LOCK SERVICE INSTRUCTIONS

Information on how to remove and replace locks is included with each key machine. If Registration Card in Code Book is returned promptly, additional Lock and Key Service bulletins will be sent as issued.

KEY BLANK STOCK BOARD
(No. 59118 — \$1.00 Net)

Holds 26 hooks for holding the commonly used key blanks, convenient to your machine. Cardboard copies of the blanks are furnished for hanging on the hooks, making it easy to identify and reorder. Size 9" x 12". A necessity for every Key Department.

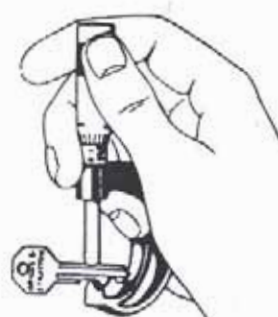

LOCK ASSEMBLY TRAY
(No. 45861 — \$1.00 Net)

Six unbreakable bottles to hold lock tumblers and parts for coding locks to special combinations. Tray permits easy handling of parts, which are returned to bottles when finished.

TUMBLER FILING FIXTURE
(No. 53630 — \$0.50 Net)

Uncoded glove compartment locks have long tumblers. This hardened steel tubular fixture holds tumblers rigid, while first one side, then the other, is filed to fit key you are matching. Very simple, and necessary.

KEY MICROMETER
(No. 59117 — \$2.75 Net)

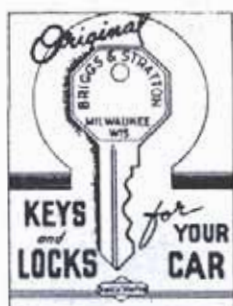

The tapered anvil enters key notches making it simple to measure depth of cuts. Also used in connection with the Key Check Chart in each Code Book to check keys cut by code—decode keys where the number is unknown—and check Key Machine adjustment.

MERCHANDISING AND ADVERTISING HELPS

POSTCARD SALES HELPS
(Nos. AS1911-12 — per 100 \$2.25 Net)

Printed on Government postcards, and imprinted with your name, for mailing to car owners. They carry a real sales message and feature your Lock and Key Department.

LOCK AND KEY DISPLAY CARD
(No. AS1092 — No Charge)

This attractive three-color sign with a large silver key is mailed to the owner of each Automotive Key Machine. Properly displayed, this sign is a big help in stimulating sales.

ATTRACTIVE DISPLAY STREAMERS
(Nos. AS1913-14 — No Charge)

Two attractive colored streamers also are furnished. These displays will catch the eye of your floor customers and sell them on the idea of lock service and extra keys.

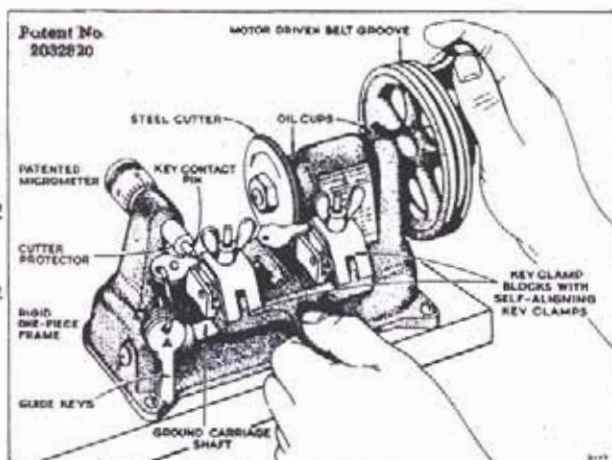

CONVENIENT SERVICE FACILITIES

All necessary equipment for cutting automotive keys and the servicing of automobile locks, as described above, may be obtained from the nearest Authorized Central Service Distributor listed on the reverse page. All equipment guaranteed by Briggs & Stratton Corp. of Milwaukee, Wisconsin.

BRIGGS & STRATTON AUTOMOTIVE KEY CUTTING MACHINE

- Precision-Built of the
Finest Materials

Up-to-Date
- Complete Key-Cutting
Code Service

Part No.
80774

- Cuts All Types of
Automotive Keys
- Cuts Keys Accurately—
No Spoilage
- Patented Universal
Micrometer Feed

\$34.75 NET
Complete with
1939 Codes

ACCURATELY DUPLICATES AND CUTS KEYS TO CODE

The new Briggs & Stratton Automotive Key Machine is designed and built for precision key cutting and years of service. Equipped with a patented micrometer that controls the cutting depth, and a completely rigid one-piece frame, it accurately duplicates or cuts to code any of the makes of automotive keys in use today, and practically all of those used in years past. Keys of the future are provided for by incorporating in the machine design a wide range of cutting depth and spacing.

BRIGGS & STRATTON: 5 Tumbler Single Bitted—6 Tumbler Double Bitted—6 Tumbler Side Bar—Small Pin Tumbler—Large Pin Tumbler.
CHICAGO: Single Bitted—Double Bitted (duplicates only).
HURD: Small Pin—Medium Pin—Large Pin.
MILLER: 5 Tumbler Single Bitted (Yale Jr.).
YALE & TOWNE: 5 Tumbler Single Bitted (Yale Jr.)—Yale Small Pin—Yale Large Pin—Yale Omega (Wafer Tumblers with offset blank).

EASILY KEPT UP-TO-DATE

Instead of using discs the Briggs & Stratton Automotive Key Machine uses spacer guide keys which are accurately made on dies. When a new type of automotive key is produced, requiring notches different from those already in use, one inexpensive spacer guide key and a set of codes will bring the machine completely up-to-date.

MICROMETER DEPTH CONTROL

Patented micrometer has large figures for easy reading and can be adjusted quickly to any required cutting depth insuring accurately cut keys. Special feature is the key contact pin which permits engaging the key notch accurately before starting to cut. This feature assures you that each key is spaced correctly, and eliminates blank spoilage.

SPACER GUIDE AND BLANK CLAMPS

Both guide and blank clamps are beveled at the correct angle to firmly hold all automotive keys. A specially designed coil spring separates the clamp and block so that, in tightening, the clamp automatically exerts a backward pressure on the key, thus forcing it solidly against the clamp block.

LOW MAINTENANCE

Simple, rugged construction and precision workmanship insure long life—nothing to get out of order. Since the rotary cutter is the only part to wear, maintenance is negligible. The cutter protector eliminates any possibility of damaging cutter or clamp. Rotary cutters, spacer guide keys, and new key codes, as issued, will be available to the trade at regular prices.

SPACER GUIDE KEYS

Accurately made spacer guide keys are notched so that the micrometer shaft fits easily and quickly into place. Guide keys are readily identified by letters which appear on each code sheet. When locks requiring new spacer guides are produced, only one new, inexpensive spacer guide key is necessary to bring the equipment up-to-date.

KEY SHOULDER GAUGES

Hardened key shoulder gauges are built into clamp blocks to accurately align spacer guide and blank into cutting position. Gauges may be pushed into recess when not needed. Gauges cannot become lost, as they are non-detachable and are always available, but never in the way or out of alignment.

COMPLETE CODE SERVICE

Complete automotive key codes are furnished with each Briggs & Stratton Automotive Key Machine in a loose-leaf book of 235 pages, bound in a substantial cover. This Code Book contains the essential key cutting instructions for automotive locks made by Briggs & Stratton Corp., Chicago Lock Co., Hurd Lock Co., and Yale & Towne Mfg. Co.

LOCK SERVICE INSTRUCTIONS

Lock Service Supplements describing the best methods of cutting keys and servicing locks will be mailed free to all Universal Key Machine owners upon return of the registration card accompanying each machine.
