

2010 COMPREHENSIVE CATALOG

Includes: Lock & Key, Transponder Guide and New Product Information

2010 COMPREHENSIVE CATALOG

Includes: Lock & Key, Transponder Guide and New Product Information

Welcome to the new 2010 STRATTEC™ Comprehensive Catalog. We're sure you'll find this quick reference tool a handy source for servicing the new 2010 cars and trucks out on the road today.

Ordering STRATTEC™ original automotive parts means you'll receive the same quality parts designed and manufactured for the original vehicle. Just place your order with a local distributor in your area. Their names are listed on the back cover. And thanks for choosing STRATTEC™ as your original parts source.

DISCOVERING THE PARTS YOU NEED

To make it easier for you to locate parts you need, we've arranged the catalog alphabetically by manufacturer, vehicle division and nameplate.

If you need to service a Dodge Caravan, for example, first look for Dodge. Then, locate Caravan. Here, you'll find key blanks, caps and shutters, ignitions, doors, decks/tailgates/rear doors and glove boxes in one easy-to-locate chart. You'll also find that most nameplate listings include manufacturers' platform designations. For example, the platform designation for Ford Taurus is D258.

We organized the illustrations by manufacturer, not by division or nameplate. We've also condensed the part number series for sequential tumblers. For example, you'll see: Tumblers (#1 – #5) 322251 – 322255.

WATCH FOR HELPFUL SYMBOLS

When you see this symbol ♦ you'll know this is a new part or part number for 2010, not found in previous catalogs or price lists.

DEFINING TERMINOLOGY

- **Alarm** – A factory-installed anti-theft system
- **Dual** – Lock service package containing both black and chrome components
- **Electric** – Refers to an actuating switch on the back of the cylinder to perform an automatic power function, not to be confused with a power lock
- **Fleet** – Single-key vehicles, all keyed alike
- **PASSKey** – Replaces VATS in GM terminology, refers to the key and pellet system introduced in 1986
- **PassLock** – MRD – Separate GM security system from the Pass Key, relies on a magnetic rotating device contained in the cylinder housing, introduced in 1996
- **PATS** – Ford Passive Anti-Theft System, with a transponder in the key that operates with radio frequency, introduced in 1996
- **RFID** – Radio Frequency Identification utilizes Transponder Technology
- **U Groove** – GM's unrestricted groove refers to uncoded cylinders, lock service packages and lock assemblies, accepts all GM key sections A – K
- **Universal** – Part may vary from production model in color or material, but will fit and function properly, typically applies to nonhanded parts
- **IPATS** – Ford's next generation Transponder Encrypted Technology, introduced in 2000
- **PEPS** – Passive Entry Passive Start, GM's Passive technology

2010 TRANSPONDER GUIDE

Simple mechanical auto locks are rapidly losing ground to the next generation of lock technology — transponder keys. In this innovative system, an electronic chip (the transponder) imbedded in the key transmits and verifies a code with the car's on-board computer systems, allowing the car to start. If someone attempts to start the vehicle without the correct programmed key the car will not start.

HOW A TRANSPONDER KEY WORKS. AND WHY IT CAN WORK WONDERS FOR YOUR BUSINESS.

Transponder technology represents a major advance in theft protection — and a profitable opportunity for you. Since its introduction in 1996, transponder key use has grown to over 70 million cars in North America today. And with replacement costs currently averaging \$50 to \$300 per key, your reward in servicing the technology will match the vehicle owner's satisfaction of being protected by it.

MODEL YEAR I.D. BY VIN

Typical VIN*	1	4	2	W	G	1	5	8	X	Y	5	0	6	9	7	3	4
VIN Character	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17

MODEL YEAR

X = 1999 Y = 2000 1 = 2001 2 = 2002 3 = 2003 4 = 2004 5 = 2005 6 = 2006 7 = 2007 8 = 2008 9 = 2009 10 = 2010

The 10th character of the VIN identifies the model year. In the VIN listed above "Y" represents model year 2000.

ON-BOARD
PROGRAM

1

GENERAL MOTORS*
PK3 & ⊕ "CIRCLE-PLUS"**ADD DUPLICATE KEY** (Requires at least one working key):

1. Verify that the new key has "PK3" or "+" stamped on it.
2. Insert the original, already programmed key in the ignition and start the engine. If the engine will not start, see your dealer for service.
3. After the engine has started, turn the key to off and remove the key.
4. Insert the key to be programmed and turn it to on within 10 seconds of removing the original key.
5. The security light will turn off once the key has been programmed. It may not be apparent that the security light went on due to how quickly the key is programmed. (If your vehicle does not have a security light (04-07 Grand Prix, Bonneville,

Impala), wait 10 minutes 45 seconds to make sure the key has been programmed).

6. Repeat steps 1 through 5 if additional keys are to be programmed.

* **Canadian VIN vehicles excluded.** On-board programming not available for these vehicles. In many cases a Tech II or dealer equivalent tool would need to be used.

ON-BOARD
PROGRAM

2

1997 FORD, LINCOLN, MERCURY
1998 NAVIGATOR/EXPEDITION**ORIGINATE NEW MASTER KEY:**

1. Put the new key into the ignition. Turn it to the ON position. The dashboard security light will flash for 15 minutes. Once the dashboard security light stops flashing, you have five minutes to begin Step 2.
2. Turn the ignition OFF and then back to the ON position. The dashboard security light will flash for 15 additional minutes.
3. Repeat Step 2.
4. Once the dashboard security light has turned off for the third time, the key will be able to function in the car. It has been programmed into the car's computer and has replaced ALL previous electronic key codes — the computer will not recognize any other key.

ADD DUPLICATE KEY:

1. Put the current key into the ignition.
2. Turn the ignition ON and back to OFF.
3. Remove the current key and insert the new key, turning it ON. You **MUST** do this within 15 seconds.
4. The security light will switch on for two seconds, confirming that the key has been successfully programmed into the vehicle.

ON-BOARD PROGRAM	3	1998+ FORD, LINCOLN, MERCURY	
ADD KEY (requires two working keys): - Put a current key into the ignition. - Turn the ignition to ON, then back to the OFF position. - Remove the key and insert a second key. Turn it ON and back to the OFF position. You MUST do this within five seconds. - Before ten seconds have elapsed, put a new key in and turn the ignition ON. After one second, turn the key back to the OFF position. - The dashboard security light will glow for three seconds. This confirms the programming of the new key has been successful.			
ON-BOARD PROGRAM	4	1998 MAZDA 626	
ORIGINATE NEW MASTER KEY or ADD KEY: - Put new key into ignition and turn it ON. Turn back to the LOCK position. Repeat this five times rapidly — the lock cannot stay in any one position longer than one second during Step 1. - Turn the key to the ON position. The dashboard security light should flash. In the next 20 seconds, turn the key to LOCK. The key should rest in that position for five minutes. After this time has elapsed, the security light's rate of flashing will be much slower. - Enter the 8 digit word code. The word code is unique to each Immobilizer Unit. - You can obtain the word code by giving Mazda the vehicle's Immobilizer Unit serial number or by using the Code-Seeker if you have the Mazda software. - Turn the ignition ON while watching the security light (the security light is not on at this time). When the security light begins to flash, count the number of flashes. When the number of flashes equals the first digit of the word code, turn the key back to the LOCK position. - Within 30 seconds, turn the key to ON and count the flashes. When the number of flashes matches the value of the second digit of the word code, turn the key back to the lock position. - Repeat Step 6 until all eight word code digits are entered. NOTE: Do not turn the vehicle on or off while the security light is on. - The password has been entered successfully when the dashboard security light remains on with no flashing. - Start the vehicle. Within two seconds the security light should turn off. - Thirty seconds after the last key has been removed, the vehicle will return to normal operation, ending the programming mode.			

ON-BOARD
PROGRAM

5

1998-2001 TOYOTA, LEXUS

**TO DELETE ALL BUT ONE KEY FROM THE UNIT:**

1. Depress and release brake and accelerator pedals once, doing both at the same time.
2. Put an existing master key into the ignition. Leave the key in the LOCK position; do not turn it.
3. Press and release the accelerator pedal, six times, within 15 seconds of inserting the key.
4. Within 20 seconds of Step 3, press and release the brake pedal seven times.
5. The dashboard security light will flash. This confirms that all keys (except the one currently being used) have been deleted.
6. Within ten seconds, remove the key from the ignition cylinder. This is now the only key still programmed to work.

ADD KEY:

1. Press and release the brake and accelerator pedals once, doing both at the same time.
2. Put the existing master key into the ignition.
3. Press and release the accelerator pedal five times within 15 seconds.
4. Press and release the brake pedal six times within 20 seconds and remove key.
5. Insert new key into ignition within ten seconds.
6. Press and release the accelerator pedal once within ten seconds.
7. The security light will turn off after 80 seconds. This indicates that the new key is now registered.
8. Remove new key. Press and release the brake pedal once.

ON-BOARD
PROGRAM

6

1998+ CHRYSLER, DODGE
1999+ JEEP**ADD KEY (Must have two working Sentry Keys):**

1. Put one of the two current keys into the ignition and turn to the ON position.
2. After the key has been in the ON position for at least three seconds — but no more than 15 seconds — turn the key back to the OFF position.
3. Take the key out and put in the second current key, turning it to the ON position, all within 15 seconds. The second key cannot be the same as the first key.
4. After ten seconds, a theft alarm light will illuminate and a single chime will sound. This confirms entry into "Customer Programming Mode".
5. Within 60 seconds, turn key OFF and remove the current key.
6. Put a new key into the ignition and turn to the ON position.
7. After ten seconds, a single chime will sound. The theft alarm light will turn off. Wait three seconds and turn key OFF.
8. Repeat these steps for additional keys.

ON-BOARD PROGRAM	7	2001+ FORD FOCUS, FORD ESCAPE 2001+ MAZDA TRIBUTE ONLY	
<u>ORIGINATE NEW MASTER KEY:</u> Two working keys are required to program additional keys with this on-board programming method. <u>ADD KEY (Requires two working keys):</u> - Put the existing key into the ignition. - Turn the ignition ON, then turn it OFF again. - Within five seconds, take out the existing key and put in a second key, turning it to ON and back OFF. - Within ten seconds, put in the new key and turn it on. After one second, turn it OFF. - The security light will glow for three seconds. This confirms the new key has been programmed successfully.			
ON-BOARD PROGRAM	8	2002+ TOYOTA, LEXUS	
Keys can be programmed using the Code-Seeker on most 32 bit systems. The 2003 and 2004 Sequoia requires flashing. <u>TO DELETE ALL BUT ONE KEY FROM THE UNIT:</u> - Simultaneously depress and release brake and accelerator pedals 1 time. - Insert an existing master key into the ignition cylinder. Do not turn the key from the OFF (LOCK) position. - Within fifteen seconds of inserting the key, depress and release the accelerator pedal six times. - Within twenty seconds of completing the above step, depress and release the brake seven times. - The security light will flash, indicating all keys other than the one being used have been deleted. - Remove the key from the ignition cylinder within ten seconds. It will be the only key still programmed to work. <u>ADD DUPLICATE KEY:</u> Requires one working Toyota/Lexus Master key. - Make sure all doors and windows are closed - Insert Master key into the ignition cylinder. - Cycle the ignition cylinder from ON to OFF five times. - Open and close the driver side door six times. - Remove the Master key and insert the new duplicate key. - TURN THE IGNITION CYLINDER ON. - The new key will be registered after 60 seconds. The THEFT light on the dashboard will go out, indicating that the programming has been completed.			

ON-BOARD PROGRAM	9	2006 FORD FUSION 2006 MERCURY MILAN 2006 LINCOLN ZEPHYR
-------------------------	----------	--

ADD KEY (Must have two working original keys):

1. Insert the first previously programmed coded keys into the ignition.
2. Turn the ignition from the 1 (LOCK) position to the 3 (RUN) position. Keep the ignition in the 3 (RUN) position for at least 3 seconds, but no more than 10 seconds.
3. Turn the ignition to the 1 (LOCK) position and remove the first coded key from the ignition.
4. Within 10 seconds of turning the ignition to the 1 (LOCK) position, insert the second previously coded key into the ignition.
5. Turn the ignition from the 1 (LOCK) position to the 3 (RUN) position. Keep the ignition in the 3 (RUN) position for at least 3 seconds, but no more than 10 seconds.
6. Turn the ignition to the 1 (LOCK) position and remove the second coded key from the ignition.
7. Within 20 seconds of turning the ignition to the 1 (LOCK) position and removing the previously programmed coded key, insert the new un-programmed key (new key/valet key) into the ignition.

8. Turn the ignition from the 1 (LOCK) position to the 3 (RUN) position. Keep the ignition in the 3 (RUN) position for at least 6 seconds.
9. Remove the newly programmed coded key from the ignition.

If the key has been successfully programmed, it will start the vehicle's engine and will operate the remote entry system (if the new key is an Integrated Keyhead Transmitter). The theft indicator light will illuminate for 3 seconds and then go out to indicate successful programming.

If the key was not successfully programmed, it will not start your vehicle's engine and/or will not operate the remote entry features. The theft indicator light may flash on and off. Wait 20 seconds and you may repeat Steps 1 through 8. If the failure repeats, bring your vehicle to your authorized dealer to have the new key(s) programmed.

To program additional new un-programmed key(s), wait 20 seconds and then repeat this procedure from Step 1.

ON-BOARD PROGRAM	10	2008 CHRYSLER TOWN & COUNTRY VAN 2008 DODGE CHARGER 2008 DODGE MAGNUM 2008 JEEP COMMANDER
-------------------------	-----------	--

2008 JEEP GRAND CHEROKEE
2008 CHRYSLER 300

ADD KEY (Must have two working integrated keys):

1. Insert first working integrated key into the ignition switch and turn the ignition switch to the ON position for at least 3 seconds, but no longer than 15 seconds. Turn the ignition switch to the LOCK position and remove the first key.
2. Insert the second working integrated key and turn the ignition switch to the ON position within 15 seconds. After 10 seconds, a chime will sound and the Vehicle Security Alarm Indicator Light will begin to flash. Turn the ignition switch to the LOCK position and remove the second key.

3. Insert a blank integrated key into the ignition switch and turn the ignition switch to the ON position within 60 seconds. After 10 seconds, a single chime will sound and the Vehicle Security Alarm Indicator Light will stop flashing. Turn on again for 3 seconds and then turn off.

The new integrated key is programmed. The Remote Keyless Entry (RKE) transmitter will also be programmed during this procedure.

Repeat this procedure to program up to 8 keys.

ON-BOARD PROGRAM 11	2010 CHEVROLET CAMARO 
ADDING KEYS (North America, except Canada): Note: - To initiate, this procedure requires that a learned master key be available. - A total of 10 keys may be programmed to a single vehicle. - This procedure adds keys only. The procedure does not erase previously learned keys. - The keys to be learned must duplicate the mechanical cut of the current key. - If more than one valet key is to be learned, immediately precede each valet key with a learned master key. - With a previously learned master key, turn ON the ignition, with the engine OFF. - Turn OFF the ignition and remove the key. - Within 10 seconds of turning OFF the ignition, insert the key to be learned and turn ON the ignition. The vehicle has now learned the new key.
