TRANSPONDER GUIDE ⋮ 2005

STRATTEC
TRUSTED SOURCE. MANY SOLUTIONS
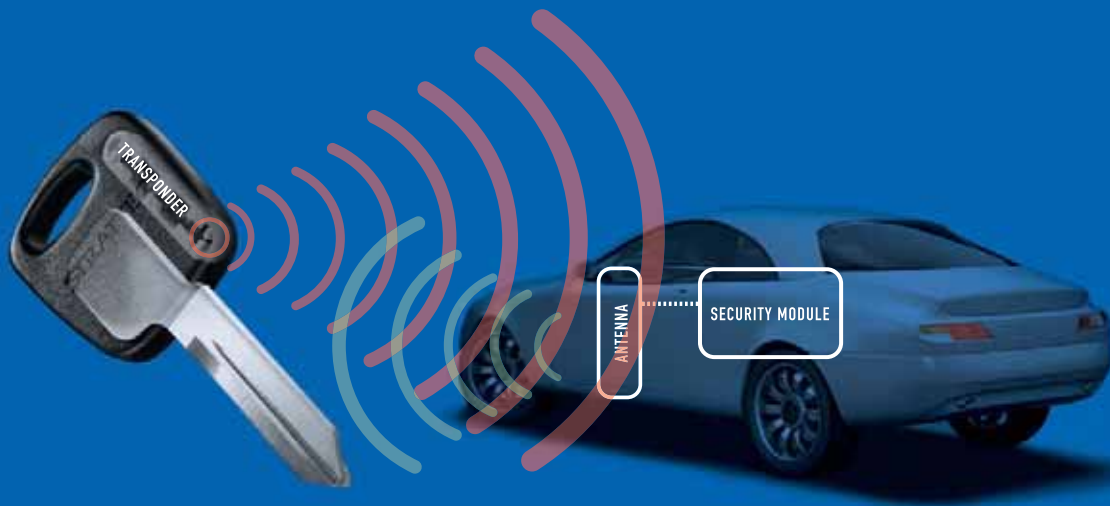

Simple mechanical auto locks are rapidly losing ground to the next generation of lock technology — transponder keys. In this innovative system, an electronic chip (the transponder) imbedded in the key transmits and verifies a code with the car's on-board computer systems, allowing the car to start. If someone attempts to start the vehicle without the correct programmed key the car will not start.

HOW A TRANSPONDER KEY WORKS.
AND WHY IT CAN WORK WONDERS FOR YOUR BUSINESS.

Transponder technology represents a major advance in theft protection — and a profitable opportunity for you. Since its introduction in 1996, transponder key use has grown to over 70 million cars in North America today. And with replacement costs currently averaging $50 to $300 per key, your reward in servicing the technology will match the vehicle owner's satisfaction of being protected by it.

STRATTEC

WE'VE BUILT EVERYTHING INTO OUR TOOLS. INCLUDING OUR REPUTATION.

CODE-SEEKER™ | Part #708884

INTRODUCING CODE-SEEKER FROM STRATTEC. It's not just a new automotive programming tool — it's a money-making machine.

On the job, CODE-SEEKER is easy to use and adapt; it adds, erases and programs keys; it's fully upgradeable to accommodate future vehicles and features an ergonomic slim line design.

And with CODE-SEEKER's low price, you'll put more money in your pocket — not into expensive tools and unpredictable upgrade fees.

OUTSTANDING PERFORMANCE!
STRATTEC, the world leader in automotive lock technology, offers accurate and reliable 24-7 customer service with its toll-free tech line and support. Leasing options available call CODE-SEEKER sales at 877-251-8798 to order your money-making machine today.

Visit aftermarket.strattec.com for more information.

Utilizing cutting edge technology, our QUICK-CODE cloning tool has the ability to duplicate and display the transponder's permanent code as well as identify transponder presence. It is fitted with the most innovative electronic components and the software is easily updated. Included is our revolutionary service and the security of knowing we back our cloning tools with FREE UPGRADES FOR LIFE.

3.00 VERSION

QUICK-CODE™ | Part #708883

The QUICK-CODE is easy to use with on-screen instructions that are clear and easy to follow. Its side-fitted antenna allows keys to be read without removing from the key ring. Extremely versatile, it comes with USB and RS232 interface for linking to a computer. This allows for simple high-speed data transfer.

Visit aftermarket.strattec.com for more information.

STRATTEC

ON-BOARD PROGRAM 1 — BUICK & CADILLAC

ORIGINATE NEW MASTER KEY:

1. Put the new key into the ignition cylinder and turn to the ON position. The dashboard security light will turn on and remain on for ten minutes.

2. Once the dashboard security light turns off, you have 60 seconds to start Step 2. Turn the ignition cylinder to OFF, then turn it back to the ON position. The dashboard security light will turn on and stay on for an additional ten minutes.

3. Repeat of Step 2.

4. Once the dashboard security light has turned off for the third time, the key will be able to function in the car. It has been programmed into the car's computer and has replaced ALL previous electronic key codes — the computer will not recognize any other key.

ADD DUPLICATE KEY:

1. Put the current key into the ignition.

2. Turn the ignition ON and back to OFF.

3. Remove the current key and insert the new key, turning it ON. You MUST do this within 15 seconds.

4. The security light will switch on for two seconds, confirming that the key has been successfully programmed into the vehicle.

ON-BOARD PROGRAM 2 — 1997 FORD, LINCOLN, MERCURY / 1998 FORD, MERCURY

ORIGINATE NEW MASTER KEY:

1. Put the new key into the ignition. Turn it to the ON position. The dashboard security light will flash for 15 minutes.

2. Once the dashboard security light stops flashing, you have five minutes to begin Step 2. Turn the ignition OFF and then back to the ON position. The dashboard security light will flash for 15 additional minutes.

3. Repeat of Step 2.

4. Once the dashboard security light has turned off for the third time, the key will be able to function in the car. It has been programmed into the car's computer and has replaced ALL previous electronic key codes — the computer will not recognize any other key.

ADD DUPLICATE KEY:

1. Put the current key into the ignition.

2. Turn the ignition ON and back to OFF.

3. Remove the current key and insert the new key, turning it ON. You MUST do this within 15 seconds.

4. The security light will switch on for two seconds, confirming that the key has been successfully programmed into the vehicle.

STRATTEC

ON-BOARD PROGRAM 3

1998+ FORD, LINCOLN, MERCURY

ADD KEY (requires two working keys):

1. Put a current key into the ignition.

2. Turn the ignition to ON, then back to the OFF position.

3. Remove the key and insert a second key. Turn it ON and back to the OFF position. You MUST do this within five seconds.

4. Before ten seconds have elapsed, put a new key in and turn the ignition ON. After one second, turn the key back to the OFF position.

5. The dashboard security light will glow for three seconds. This confirms the programming of the new key has been successful.

ON-BOARD PROGRAM 4

1998 MAZDA 626

ORIGINATE NEW MASTER KEY or ADD KEY:

1. Put new key into ignition and turn it ON. Turn back to the LOCK position. Repeat this five times rapidly — the lock cannot stay in any one position longer than one second during Step 1.

2. Turn the key to the ON position. The dashboard security light should flash. In the next 20 seconds, turn the key to LOCK. The key should rest in that position for five minutes. After this time has elapsed, the security light's rate of flashing will be much slower.

3. Enter the code password within 20 seconds.

4. You can obtain the code password by giving Mazda the vehicle's Immobilizer Unit serial number. It is an eight digit number, unique to each Immobilizer Unit.

5. Turn the ignition ON while watching the flashing security light. Count the number of flashes. When the number of flashes equals the first digit of the password, turn the key back to the LOCK position.

6. Within thirty seconds, turn the key to ON and count the flashes. When the number of flashes matches the value of the second digit of the password, turn the key back to the LOCK position.

7. Repeat Step 6 until all eight password digits are entered. NOTE: Turn the key from one position to the other ONLY when the security light is NOT illuminated. If you lose count or make a mistake, wait 45 seconds and start over at Step 1.

8. The password has been entered successfully when the dashboard security light remains on with no flashing.

9. Start the vehicle. Within two seconds, the security light should turn off.

10. To add additional new keys, put them in the ignition and start the car within 20 seconds of removing the original key.

11. Thirty seconds after the last key has been removed, the vehicle will return to normal operation, ending the programming mode.

ON-BOARD PROGRAM 5 — 1998–2001 TOYOTA, LEXUS

TO DELETE ALL BUT ONE KEY FROM THE UNIT:

1. Depress and release brake and accelerator pedals once, doing both at the same time.

2. Put an existing master key into the ignition. Leave the key in the LOCK position; do not turn it.

3. Press and release the accelerator pedal, six times, within 15 seconds of inserting the key.

4. Within 20 seconds of Step 3, press and release the brake pedal seven times.

5. The dashboard security light will flash. This confirms that all keys (except the one currently being used) have been deleted.

6. Within ten seconds, remove the key from the ignition cylinder. This is now the only key still programmed to work.

ADD KEY:

1. Press and release the brake and accelerator pedals once, doing both at the same time.

2. Put the existing master key into the ignition.

3. Press and release the accelerator pedal five times within 15 seconds.

4. Press and release the brake pedal six times within 20 seconds and remove key.

5. Insert new key into ignition within ten seconds.

6. Press and release the accelerator pedal once within ten seconds.

7. The security light will turn off after 80 seconds. This indicates that the new key is now registered.

8. Remove new key. Press and release the brake pedal once.

ON-BOARD PROGRAM 6 — 1998+ CHRYSLER, DODGE / 1999+ JEEP

ADD KEY (Must have two programmed Sentry Keys):

1. Put one of the two current keys into the ignition and turn to the ON position.

2. After the key has been in the ON position for at least three seconds — but no more than 15 seconds — turn the key back to the OFF position.

3. Take the key out, and put in the second current key, turning it to the ON position, all within 15 seconds. The second key cannot be the same as the first key.

4. After ten seconds, a theft alarm light will illuminate and a single chime will sound. This confirms entry into "Customer Programming Mode".

5. Within 60 seconds, turn key OFF and remove the current key.

6. Put a new key into the ignition and turn to the ON position.

7. After ten seconds, a single chime will sound. The theft alarm light will turn off. Wait three seconds and turn key OFF.

8. Repeat these steps for additional keys.

STRATTEC

ON-BOARD PROGRAM 7

2001+ GM "Export" vehicles

equipped with the PK3+ system. Export vehicles are easily identified by a "2 or 3" digit in the first position of the VIN Number.

ORIGINATE NEW MASTER KEY: (Master Keys must be used)

1. To do this, make appropriate cuts into a GM Master Key.

2. Put the new working key into the ignition. Turn it to the ON position. This will trigger the theft light, which will stay lit for approximately ten minutes.

3. Once the light turns off, repeat Step #2, two more times.

4. When the theft light turns off, the new key is programmed.

TO PROGRAM THE SECOND KEY:

1. Put in a second Master Key and turn it ON, within 20 seconds of finishing the last step for the first key.

2. The key is programmed when the light turns off.

3. Repeat these steps for programming up to 12 additional keys.

ADD KEY: (Must have two programmed Sentry Keys)

1. Put the first working key into the ignition.

2. Turn the key to the ON position.

3. Remove the key when the security light turns off.

4. Put the second working key into the ignition and turn it to the ON position.

5. Remove the key when the security light turns off.

6. Put in the new duplicate key and turn the ignition ON.

7. The key has been programmed when the security light turns off.

ON-BOARD PROGRAM 8

2001+ FORD FOCUS, FORD ESCAPE
2001+ MAZDA TRIBUTE ONLY

ORIGINATE NEW MASTER KEY:

Two pre-programmed keys are required to program additional keys with this on-board programming method.

ADD KEY: (Requires two working keys)

1. Put the existing key into the ignition.

2. Turn the ignition ON, then turn it OFF again.

3. Within five seconds, take out the existing key and put in a second key, turning it to ON and back OFF.

4. Within ten seconds, put in the new key and turn it on. After one second, turn it OFF.

5. The security light will glow for three seconds. This confirms the new key has been programmed successfully.

6. After the key has been programmed, it MUST remain in the ignition for 20 minutes to fully complete the programming procedure. Do NOT remove the key! If an attempt is made to start the vehicle or remove the key from the ignition before 20 minutes have elapsed, the keys will not function properly. The programming procedure will have to be repeated from Step 1.
